

SECTION B:

a) Word processors
HTML editors

b) Advantages of HTML

- Easy to learn and use
- Software is available for free
- It convenient for beginners in web design
- It upholds data storage

Disadvantages

- It can not be changed
- It is not completely secure
- It is complex because of long codes

c.)File transfer protocol-transfers files to and from a remote network.

Telnet-It helps terminal and terminal oriented processes to communicate on a network that runs.

TFTP -works as ftp but the user cannot access the net without knowing the file to be copied.
client/server works.

d.)Maintain network infrastructure

Resolve domain names

Prevents internet traffic

e.)

Ease of navigation-by making it legible and easy to read on any screen

Attractiveness-by using clear fonts colours and different designs maybe used, do not overstock photos and use a simple layout

Effectiveness-the site should be well designed and functional it should also be easy to use and optimized for mobility.

Efficiency-use a reliable browser and provide links,icons to enable the user navigate the website

web development we will learn

1. HTML hyper text markup language
